PROFESSIONAL SUMMARY

Engineering and technology leader with 20+ years of experience building and governing enterprise platforms across banking, fintech, retail, and regulated environments. Proven track record of modernizing legacy systems into scalable cloud-native architectures and leading cross-functional organizations to deliver mission-critical systems. Currently focused on Independent Consultancy, specializing in Intelligent Document Processing (IDP) and AI-assisted workflows.

INDEPENDENT CONSULTANT

Financial Services & Enterprise Clients | Aug 2024 – Present

- **AI & Intelligent Document Processing (IDP):** Designed and implemented IDP platforms to automate ingestion, classification, and extraction of financial documents, reducing manual processing by over 80%.
- **Bank Statement Analysis:** Developed tools for 12/24-month bank statement analysis using AWS Textract and custom Python logic to automate entry ingestion, calculate balances, and flag unusual transactions.
- **RAG & Conversational AI:** Built a RAG-based chatbot trained on Fannie Mae, Freddie Mac, and client-specific rules to assist sales and support teams; engineered automated document splitting, embeddings, and vector database storage.
- **Multi-tenant Chatbot Systems:** Developed a system capable of scraping website content into a PostgreSQL vector database, utilizing OpenAI for context-aware conversation polishing.
- **Enterprise HRIS & BPO Tools:** Built a multi-timezone HRIS with attendance tracking and Microsoft Teams-integrated recruitment modules; developed a multi-tenant Task Management system for BPO loan origination and underwriting visibility.
- **DevOps & CI/CD Standardization:** Established standardized development frameworks using NextJS, shadcn, and NestJS; implemented CI/CD pipelines via GitHub Actions and AWS Lambda for microservices.
- **Government AI POC:** Delivered a self-hosted, Kubernetes-based AI-assisted system within strict compliance and security constraints.
- **US Mortgage Compliance & Automation:** Engineered a loan application management layer integrated with a US-based LOS, ensuring full Fannie Mae (FNMA) compliance and MISMO 3.4 data output.
- **Automated Loan Auditing:** Developed document processing workflows to cross-reference loan data against unstructured submissions, including bank statements, income statements, HOI, property taxes, and government IDs.
- **Computer Vision & Education Tech:** Developed an Optical Mark Recognition (OMR) system to automate high school exam scoring using OpenCV, providing real-time access for students and regional government officials.
Source: github.com/smicapplab/OMR-PROD | github.com/smicapplab/OMR-POC
- **Fintech Startup Engineering:** Architected a full-scale Loan Origination System (LOS) using SvelteKit and NestJS deployed on AWS Lambda, covering borrower onboarding through back-office management.

PROFESSIONAL EXPERIENCE

Head of Products and Technology

Investree Philippines | Mar 2023 – Aug 2024

- **Cloud Modernization:** Engineered an iterative strategy to transition legacy monolithic systems from AliCloud/Kubernetes to a serverless microservices architecture on AWS, successfully reducing monthly infrastructure costs.
- **Organizational Design:** Established a local engineering organization in the Philippines, implementing Agile/Scrum methodologies to transition development operations from Indonesia.
- **Mobile & Automation:** Designed a native Flutter mobile app for Post-Dated Check (PDC) ingestion, replacing manual entry with automated OCR data capture.
- **Strategic Governance:** Partnered with Finance and Risk leaders to align fintech platforms with regulatory requirements and audit controls.

Head of Omnichannel / AppLabs

SM Investments Corporation | Jan 2017 – Feb 2023

- **Omnichannel Ecosystem:** Built a full-scale e-commerce platform from scratch, integrating legacy systems with third-party channels like Lazada and Shopee.
- **End-to-End Retail Suite:** Developed modules for merchandising, inventory, promotions, prediction engines, and fulfillment/delivery tracking.
- **Enterprise Gift Registry:** Architected a registry platform allowing users to curate events via digital catalogs or in-store barcode scanning with integrated social sharing.
- **Logistics & Travel:** Directed the development of a mobile-first travel app using Flutter, enabling real-time booking and payments.
- **Scaling & Governance:** Scaled the team from 5 to 25 members while standardizing CI/CD pipelines on AWS, reducing deployment cycles by 40%.

Head of Innovations Office – Labs

Metropolitan Bank & Trust Company (Metrobank) | Apr 2015 – Dec 2016

- **Social Banking Model:** Introduced "Peer & Biller" focused interfaces for web and mobile banking, moving beyond account-centric views to relationship-based transaction management.
- **Financial Utility Features:** Launched social-financial modules including "Split Bills," peer payment requests, and integrated third-party prepaid mobile reloading.
- **Digital Branch Innovation:** Deployed a functional Digital Queuing System POC featuring touch-screen kiosks and integrated digital signage.
- **Process Transformation:** Championed the transition from waterfall to Agile/Scrum within highly regulated bank operations.

Senior Software Development Manager

SunGard – Retail Banking Division | Mar 2014 – Apr 2015

- **Legacy Modernization:** Directed the architectural transformation of legacy Oracle Forms core banking systems into modern, web-based architectures for international clients.
- **Distributed Team Leadership:** Managed a multidisciplinary organization of 50+ engineers across backend services, digital channels, and complex integration layers.
- **Regulatory Compliance:** Ensured all banking platforms met rigorous regional security standards and international banking regulations.
- **Operational Excellence:** Implemented DevOps practices and established controlled production release governance to stabilize mission-critical banking environments.

Software Development Head

Brewsoft Corporation | Jan 2007 – Mar 2014

- **Product Strategy & Architecture:** Owned the end-to-end product lifecycle and technical architecture for a suite of commercial and enterprise-grade software products.
- **3D Virtual Walkthrough Platform:** Designed and delivered an interactive 3D property walkthrough engine, simulating on-site visits to enhance buyer engagement for real estate clients.
- **Gamified Financial Tools:** Led the development of interactive, game-driven insurance education and calculation tools to simplify complex financial concepts for users.
- **Interactive Directory Systems:** Built and deployed touchscreen-based building navigation and wayfinding solutions across multiple commercial properties.
- **Client & Delivery Management:** Worked directly with enterprise partners to translate business concepts into scalable, revenue-generating digital products.
- **Engineering Standards:** Established reusable component libraries and development standards that supported the long-term evolution of the product portfolio

TECHNICAL FOUNDATION

- **Languages & Frameworks:** TypeScript, JavaScript, Java, Node.js, Python, Flutter, React, Next.js, NestJS, Spring Boot.
- **Cloud & AI:** AWS (Lambda, Textract, Serverless), Kubernetes, Docker, RAG, Vector Databases (PostgreSQL), Infrastructure as Code.
- **Architecture:** Microservices, Omnichannel E-commerce, FinTech Ecosystems, IDP, REST APIs.
- **DevOps:** CI/CD, Automated Testing, Release Governance, GitHub Actions.

PERSONAL PROJECTS

- **Prompt Commerce:** An open-source MCP server enabling small retailers to manage product catalogs through AI chat via a conversational interface. github.com/smicapplab/prompt-commerce
- **Hybrid HRIS:** A modular HRIS designed for Philippine labor laws (DOLE/BIR), with specialized Payroll and Statutory modules (SSS, PhilHealth, Pag-IBIG). github.com/smicapplab/hybrid-hris

EDUCATION

Bachelor of Arts – University of San Carlos

College of Arts and Sciences Award for Academic Excellence

SOPHIA Award for Academic Excellence
